

Panel Saw DF-PS36

Control the distance away from the edge and cut in a straight line!

The Panel Saw is a powerful saw that quickly and cleanly cuts through sheet metal panels up to 16 gauge. A powerful $\frac{3}{4}$ horse motor and proprietary hardened steel blade gives the user the ability to cut through virtually any external sheet metal. Light weight, compact design reduces user fatigue and gives the panel saw an added performance bonus: increased stability around tight areas. Double grip handle allows for excellent control and power in a comfortable ergonomic design. Side guide allows for a precise cut in a straight line exactly where you want it.

APPLICATION

Perform controlled panel or roof cuts with an adjustable edge guide to make perfectly straight cuts at a desired distance from the edge or valley.

FEATURE & BENEFITS

- **STRONG MOTOR** - Powers the blade with more than enough torque needed to slice through most sheet metal.
- **EDGE CONTROL**- Set the distance away from the edge and cut parallel to it.
- **DOUBLE GRIP HANDLE**- Excellent control and power in a comfortable ergonomic design.
- **HARDENED STEEL BLADE**- Proprietary design enables the user to cut through a wide variety of steels.

SPECIFICATIONS

MOTOR: PNEUMATIC
PSI: 90 PSI
HORSEPOWER: $\frac{3}{4}$
RPM: 1,000
MAX PANEL THICKNESS: 16 GAUGE

CONSUMABLES

Circular Blades

CAPABILITIES

STORAGE

Recommended to store in cool, dry location like a toolbox, drawer, or cabinet.

\$ MSRP
\$499
