

Airless Welder DF-EZA1

Mini airless plastic welder, that can dial it all the way up to 11!

The Dent Fix DF-EZA1 Airless Plastic Welder is an economical way to do basic plastic welding. Airless plastic welding has been around since the late 1970's and is still used today. Capable of repairing most basic tears, gouges, cracks, and some tabs, airless plastic welding will accomplish virtually all repairs that can be performed using adhesives. Kit includes 2 tips (1 spade spreading tip, 1 feeder welding tip). 5 types of 3mm plastic rod in, ABS, Polypropylene, Polyethylene, Polycarbonate, and Polyurethane. Small compact sizes allows it to be stored in any tool box, bag, or cart. Priced right and it comes with the famous Dent Fix 1 year warranty.

APPLICATION

Compact airless plastic welder for repairing the most basic tears, gouges, cracks, and some tabs on damaged automotive parts.

PC, PC+ABS, PC+PBT	6.5 - 7.5

CONSUMABLES

Plastic Rods (See catalog for Part #'s)

CAPABILITIES

Airless welding offers a wide variety of plastic repair options for a minimal amount of investment. 5 different types of plastic rods are included in the kit and allow for repairing the following types of plastics: ABS, Polypropylene, Polyethylene, Polycarbonate, and Polyurethane.

Easily select the correct temperature setting with the adjustment knob which raises or lowers the temperature of the tips to meet the heat requirements to correspond with the appropriate type of plastic.

A plastic Feeder Welding Tip provides a great method to melt plastic material into the V-Grove of the repair. The Spade Spreading Tip can be used to smoothed out/finish the repair.

STORAGE

Compact design allows for it to be placed inside of a tool box, bag, or cart with ease. Welding wand can be unplugged from the unit for easier storage.
