

# DELUXE

## Weld & Ground

### Weld Ground or Clamp Ground? Why not BOTH?

Finally a versatile ground to adapt to work in the most complicated grounding locations with powerful welders.

- **Multiple Mounts** Choose between clamping or welding the ground to the panel for maximum flexibility.
- **Triangular Contact Points** Disperses the energy across a broad area, avoiding heat damage.
- **Quick Release** Easily disconnect from the panel with the twist of the knob.

If your welder is not ground right, it does not work right. Ground the right way with the DF-WG90 Deluxe Weld & Ground.
