

RIV-E

MULTI-FUNCTION RIVETER

**Perfect performance,
precision, and punch.**

At only 11 lbs, the DF-SPR80B RIV-E Multi-Function Riveter is a lightweight and sophisticated computer-controlled, hydraulic-powered machine with a maximum working pressure of 80KN.

- **Precise Pressure** Set the desired pressure and the microcomputer guarantees optimal results.
- **SPR Panels** Capable of bonding 0.5 to 9mm thick aluminum panels together.
- **High Powered** Equipped with a hydraulic cylinder capable of a maximum of 80KN of pressure.

80KN
MAX PRESSURE

250 to 350
rivets on a
charge

Highly repeatable and reliable results eliminate guess work and allow for quicker panel replacement repairs.

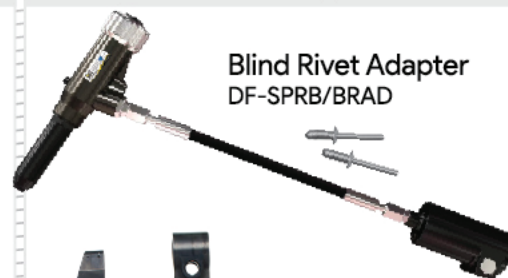

Digital Control Center

Easily set the pressure with either the nine available preset settings or choose to manually adjust the pressure to ensure ultimate control and accuracy. The LCD Screen also displays battery level, work times, temperature alarm, and real time pressure.

Premium Kit

Everything you need to start performing rivet repairs is provided in the case: Hole Punching, Rivet Removal, FFR Riveting, Flattening, and 3.3 or 5.3mm SPR Riveting. The rugged custom case organizes the riveter, die kit, rivet box, charger, and two 18V batteries.
