dentfix.com

Wow, Dent Fix is celebrating its' 45th Anniversary !

1979 to 2024, that is doing time travel the hard way, by living every moment. I am sure some of you reading this were not even alive at the time. Well, let me tell you times have changed.

In 1979 Disco died the 80's killed it with New Wave and Punk Rock. My Computer went from this huge box with a monitor that barely fit on the desk and only displayed in one color, green, to this little box the size paper back and a flat screen with a two million possible color display.

One thing that has not changed in all that time are all the possibilities that we have. I actually think now anything is possible. What a great feeling to know that we live at a time when change is going to happen at an even greater rate due to AI. Hopefully this change will be for the better, but change it will be.

Artificial Intelligence is going to advance medicine, engineering, logistics, manufacturing and everything in between, this will include collision repair. Get ready folks, because the next forty-five years are going to be fun and I will be there at 102 years young thanks to my AI nano bot immune system.

"To infinity and beyond"
– Buzz Lightyear

All the best,
Erik Spitznagel

GLUE PULLER XTREME
DF-GPX

- Pull both Steel and Aluminum
- Light to structural pulls
- Pull to paint
- No heat input

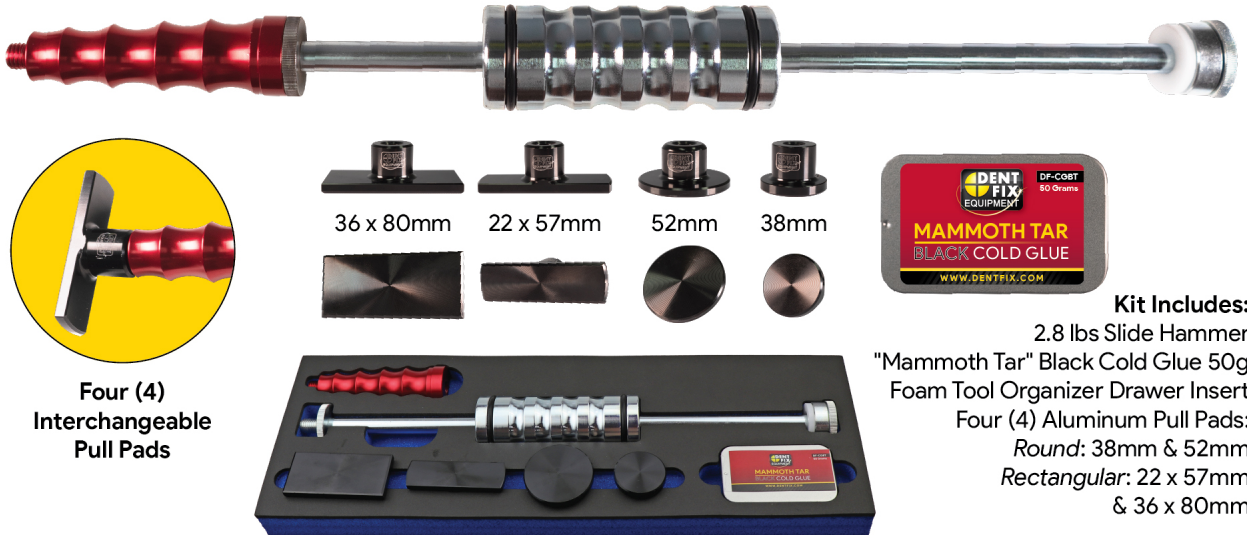

- Kit Includes:**
- Various Length Pulling Pads
 - Knockdown Tool (DF-KDTE)
 - Pulling Rigs for Chain & Post
 - Plastic Scraper Stick (DF-WK30)
 - Release Agent
 - Heavy Duty Glue Gun
 - Glue Assortment
 - Blow Molded Case

*NOTE: PULLING DEVICES SOURCED SEPARATELY

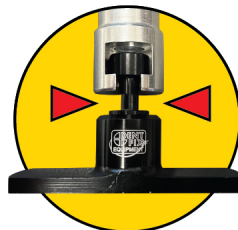

COLD ADHESIVE GLUE SLIDE HAMMER SET DF-CGS71

- Cold Glue is ready to use, reform to re-use.
- Quickly and safely move large areas of painted metal efficiently.
- Complete Cold Glue Pulling Kit that is ready to start pulling straight out of the box.

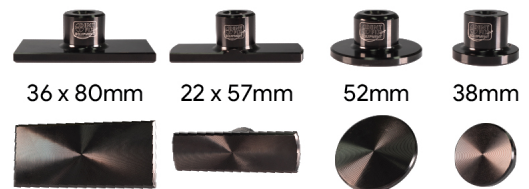

COLD ADHESIVE GLUE PADS DF-CGS72

- Convert your traditional PDR slide hammer into a cold glue puller.
- Wide variety of pull pads to choose the correct pad for the job.
- Great way to quickly and safely move large areas of metal.

Four (4) PDR Slide Hammer Adapters

- Kit Includes:**
- Four (4) Aluminum Pull Pads (Thread Size M12 x 175mm):
 - Rectangular: 22 x 57mm & 36 x 80mm
 - Round: 38mm & 52mm
 - Four (4) 11.8mm Universal PDR Slide Hammer Adapters
 - "Mammoth Tar" Black Cold Glue 50g
 - Foam Tool Organizer Drawer Insert

MAMMOTH TAR BLACK DF-CGBT

- Virtually no set-up time.
- Applied at normal room temperatures.
- Long lasting durable adhesive is reusable.

Great for everyday use

Reform Cold Glues to Renew Adhesive Ability

ARCTIC ICE LIGHT BLUE DF-CGLB

- Highest adhesion, 20-30% stronger than Mammoth Tar.
- Resilient composition is durable.
- Wide climate range for use in cool and warm climates.

20-30%
Stronger Adhesion

than Mammoth Tar

TECH TIP:

Achieve Ultimate Adhesion.

Prepping the Panel: Cleaning the panel and removing any contaminants provides a more detailed look at the damaged area but, more importantly produces the optimal adhesion conditions for cold or hot glue. Contaminants like grease, moisture, and dirt cause the cold and hot glue to release early. After the dirt is removed with soap and water, clean the area with isopropyl alcohol (91%+) and a clean rag to remove the grease. Heat the panel to 80°F, using a heat gun, to flash off any moisture accumulated on the panel.

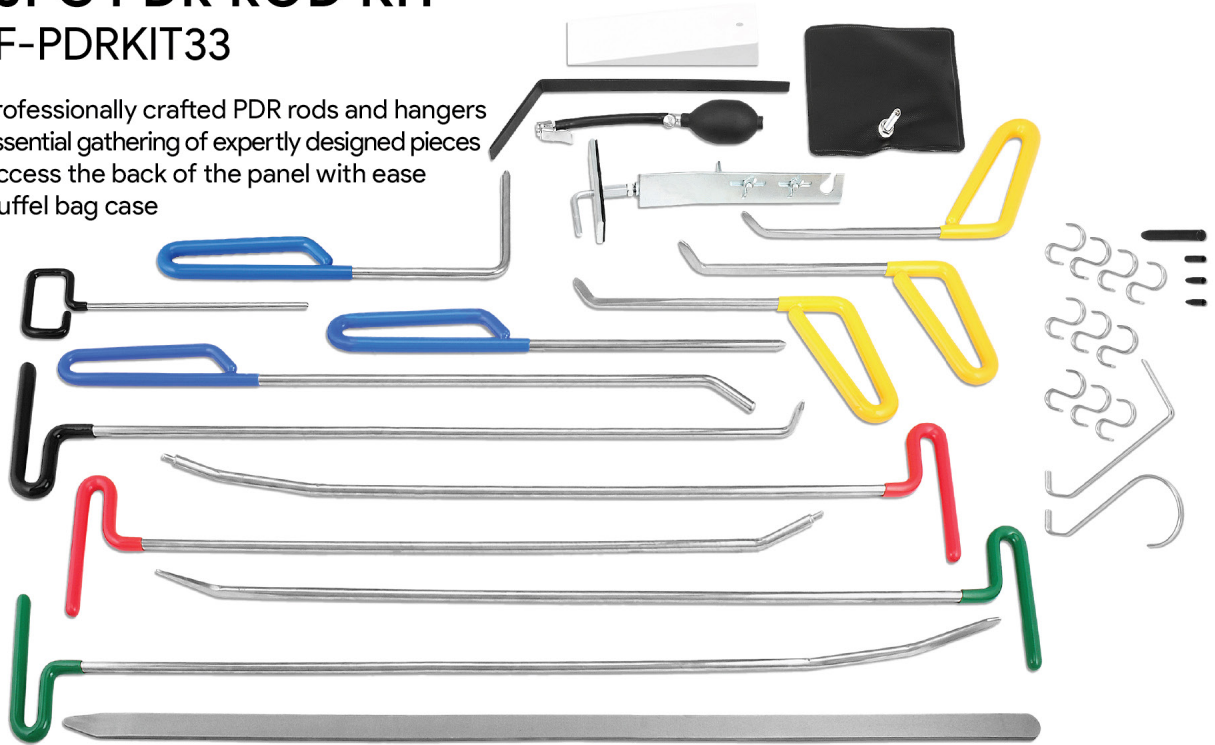

Appropriate Glue Portion Size: Select an amount of glue big enough to cover the size of the dent and slightly hang off the edge of the tab.

Preparing Cold Glue: Use your hands to manipulate the glue in a kneading action to warm up the glue to working temperature. In low temperature climates, gently heating it with a heat gun on a low setting helps to bring it to optimal working conditions.

Clean the Tab or Pad: Make sure the pull tab is clean and free from contaminants as well. Adhesion can be affected if contaminants are present. Follow the same cleaning steps for the surface of the pulling pads and tabs.

33PC PDR ROD KIT DF-PDRKIT33

- Professionally crafted PDR rods and hangers
- Essential gathering of expertly designed pieces
- Access the back of the panel with ease
- Duffel bag case

ULTRA DING MASSAGER DF-DM555UDX

- Dings, dents, & hail damage
- Easy to use & learn
- Special nibs for crease repair
- Works on steel or aluminum
- Use on OEM paint only

Kit Includes:

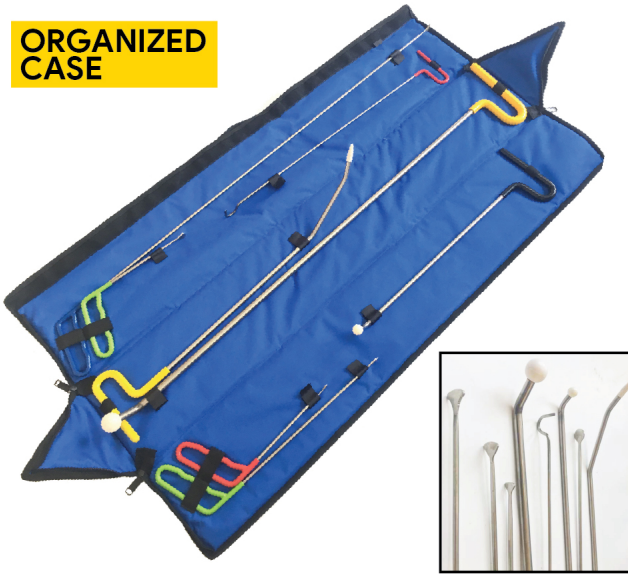

- x24 Assorted Pulling Nibs (DF-DM24VP)
- x15 Glue Sticks (DF-DM520GS)
- 120v Glue Gun (DF-DM530GG)
- Knockdown Tool (DF-KDTE)
- Squeeze Puller (DF-DM540SP)
- Slide Hammer (DF-DM530SH)
- T-Puller (DF-TPG)
- Shaping Tools
- Plastic Scraper Stick (DF-WK30)
- Release Agent (DF-DM520RA)
- Blow Molded Case

8PC PDR ROD KIT DF-PDRKIT8

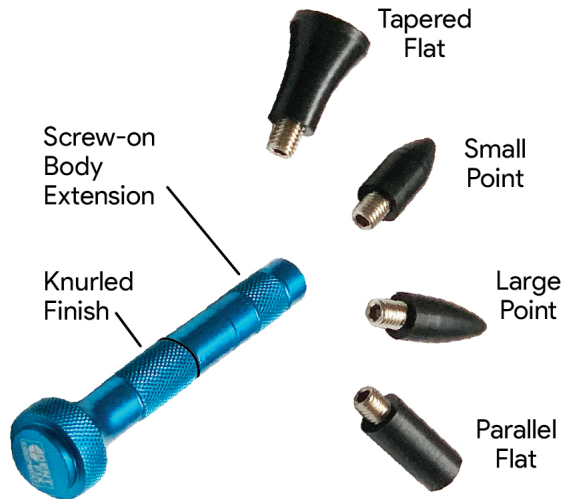

- Great introductory set of PDR tools
- All basic tools needed to start working
- Case zips up for easy transportation

**ORGANIZED
CASE**

KNOCKDOWN TOOL KIT DF-KDTE

- Four interchangeable heads
- Extend body from 100mm to 130mm
- Ideal PDR tool for high spots and small dents
- Knurled finish for precision handling & grip

DEAD BLOW HAMMER KIT DF-DB79K

- Gently knock down high spots
- Remove glue residue with the wedge end
- Include case to store hammer & tips

**GREAT FOR
PDR WORK**

**SIX TIPS
INTERCHANGEABLE**

DING ENHANCER SHIELD DF-DM55DE

From body shop estimating to dealer service check-ins, document the damage by highlighting the dings.

- Sturdy grab handle
- Large 31" diameter
- Twist to collapse
- Storage bag

ALUSPOT

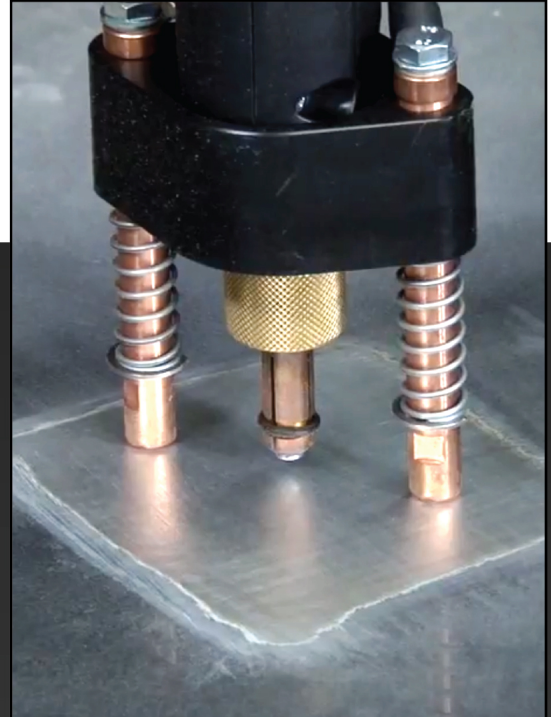

ALUMINUM REPAIR STATION

Extensive Repair Abilities

Since 2006, we have been perfecting the most capable aluminum stud welding repair station. THIS IS THE MOST COMPLETE UNIT !

The **DF-900DX/E Aluspot Extended** includes everything that the Ford Approved Aluspot (DF-900DX) has PLUS Aluminum-Head Hammer Set (DF-AH714), POM Nylon Dolly Set (DF-AB712), two more storage drawers, an in-cabinet electrical power strip, and a holster on the side of the cabinet to hang the heat gun. The most complete aluminum repair station on the market !

Deluxe Repair Capabilities

Since 2006, we have been meeting the needs for aluminum panel repair. FORD APPROVED!

The **DF-900DX Aluspot Deluxe** is the best selling aluminum repair station "from the name you know and trust." Here you have everything you need for aluminum repair, within easy reach in a self-contained system. The tools lock away so they do not wander and become contaminated with the steel particles floating around the shop.

ALUMINUM HAMMER SET DF-AH714

- Solid aluminum head
- Avoid cross contamination
- Lightweight with more forgiving strike
- Less likely to stretch aluminum panel
- Maintenance free

PERFECT FOR ALUMINUM
AVOID GALVANIC CORROSION
GENUINE HICKORY HANDLES

NYLON DOLLIES DF-AB712

SOLID POM NYLON
NON-CORROSIVE

12
PIECE

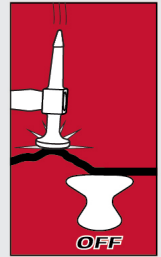

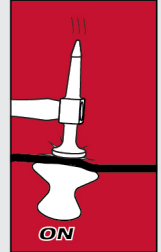

- Non-Corrosive - Perfect for Aluminum Repair
- Non-Marking - When working with metal
- Molded Case - Tools kept organized & clean
- Maintenance free

TECH TIP:**HAMMER-ON VS HAMMER-OFF TECHNIQUE**

When used properly, the two metal working techniques are very effective at repairing aluminum panels. The hammer-off dollying technique is used when first returning the dent to the original shape. Use the “first in, last out,” rule which means to work the dent in reverse, starting outside of the dent and working towards the point of impact. The tools best suited for hammer-off are highly polished steel hammers and rubberized steel core (DF-AB711). Aluminum can easily stretch, so use caution. Hammer-on is used by experienced technicians with lightweight aluminum hammers (DF-AH714) and Nylon dollies (DF-AB712) when smoothing the metal into its final position. Light tapping is used to finish.

**RUBBERIZED DOLLIES**

DF-AB711

**RUBBER SHELL
STEEL CORE****7
PIECE**

- Rubberized - Better for soft aluminum
- Steel Core - Dense center, good heft
- Case - Dollies are isolated & protected
- Maintenance free

RIVMAX RIVETING REPAIR STATION

Riveting Repairs Made Easier

This riveting work station maintains all your riveting tools in this one mobile cabinet. Bring everything you need right to the work site. Keep your tools and rivets organized and secure in the foam inserts and lockable cart. The scissor top lid opens to a large work area and specially designed cradle to rest the SPR riveter when not in use.

This RIVMAX features our DF-SPR70 Ten Ton Riveter (pg.23). It also includes many of the optional accessories such as our Ford Die Set (pg. 25), Medium Sized Arm (pg. 24), Blind Rivet Adapter (pg. 24), and the Rivet Assortment Kit (pg. 26). This bundled version comes at a much better value than buying all the individual components separately.

CONSUMABLES - See PG 27 & 66

Optional Upgrades:

- HR310 Arm
- Tesla 9 Pc Die Set
- Tesla 15 Pc Die Set
- 6.7mm Boron Punch

SELF-PIERCING RIVETER 10T

Powerful Riveter

With 10 Tons of pressure punching through Boron Steel in order to install flow-form rivets is no problem at all.

The award-winning **Self-Piercing Riveter DF-SPR70** is part of most OEM recommended methods for joining aluminum panels together. The cold forming technique requires no heat and no pre-drilled holes. Adjust rivet pressure and check on the easy-to-read dial for ultimate control to avoid panel distortion.

TECH TIP:

SECRET FOR PERFECT RIVET ALIGNMENT:

The most popular tool used all over the world for recreating crispy body lines has a secret use! To achieve laser straight SPR rivet alignment, savvy body technicians utilize a Body Line Tool to draw a guide line following the contours of the panel and maintaining the desired distance from the edge.

▶ Body Line Tools

Examples of SPR rivet insertion

Universal Rivet Assortment

DF-URAK

- Self-Piercing Rivets
- Blind Rivets
- Plastic Rivets

The DF-URAK Universal Rivet Assortment Kit comes complete with all the necessary lengths of self-piercing rivets in the 3.35 millimeter and 5.3 millimeter diameter sizes. In addition to the wide variety of SPRs it also includes an assortment of **6 of the most popular nylon blind rivets** as well as **4 varieties of structural steel blind rivets** most popular in the F-Series.

The inclusive assortment is a sampling size of all available SPR Rivet sizes. We also include the most commonly used Steel and Nylon Blind Rivets. The idea behind this configuration is to give the body shop a starting point of fasteners in one unit. As inventory is depleted the item part number is easily located on the inside box top. When the shop does re-order, they will be getting the regular full packs. The assortment price reflects a 20% value add compared to buying all the fasteners individually.

Nylon Blind Rivet Sizes:

THE MAXI

STEEL DENT PULLING STATION

#1 Steel Dent Repair Station

Since 1999, The MAXI has changed the way steel panels are repaired for the better.

The DF-505/220V MAXI Steel Dent Repair Station is 220 volt single phase (also available in 110V, DF-505/110V) steel dent pulling station that provides the technician with the power they need to shrink, pull rocker panels, hail damage, creases, and dents in hard to access areas. From light to heavy pulls, maximize your pulling abilities. Add-on additional upgrades to create the ultimate 'money maker'.

THE MAXI STEEL DENT PULLING STATION EX

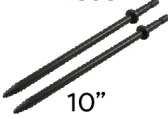

The Back Saver

The MAXI reaches a whole new level with the most ergonomic configuration EVER.

The DF-505EX220 MAXI EX Steel Dent Repair Station is 220 volt (also available in 110V, DF-505EX110) is the next evolution of the MAXI series ! The Extended Handle organizes the cables out of the way for safe movement of the unit. Combined with the Padded Seat and dual Accessory Trays, the EX brings the technician eye level with the damaged area and holds the consumables or tools poised and ready for rapid deployment.

Spot Weld Bits for Chuck Drill

Boron Killer | DF-1667

6.7x80mm Drill Bit

The ONLY way to drill through Boron Steel is with this bit. Specifically created cut spot welds from Boron Steel. German-made bits can be used with any 3/8" drill.

Titanium Nitride | DF-1780T

8x80mm Drill Bit

Specifically designed for the rigors of spot welding drilling. German-made bits can be used with any 3/8" drill. Centering nib prevents bit from walking

High Speed Cobalt | DF-1780

8x80mm Drill Bit

Specifically designed for the rigors of spot welding drilling. German-made bits can be used with any 3/8" drill. Centering nib prevents bit from walking

Weld Breaker | DF-17

Don't use any other tool than the German made DF-17, German steel Weld breaker to separate freshly drilled panels. Use when spot welds are not completely detached because of sealant, bonding glue or drill through debris.

TECH TIP:

Why Use Shunting Pliers?

Squeeze-type resistance spot welding (STRSW) sometimes requires additional measures, in the form of shunting the current flow, to create a successful spot weld.

Protective coatings on steel, such as zinc or weld-through primer increase the resistance leading to less successful initial welds. Non-conductive coatings on steel, such as corrosion resistant E-Coat also inhibit the completion of a proper spot weld.

No need to grind away protective E-coats simply use the Dent Fix Shunting Pliers (DF-SP360). Remove the coating from only the outside surfaces, position the shunting clamp at the spot weld site, and the spot weld is made at the adjacent site. The current chooses the path of least resistance when confronting the non-conductive E-Coat. The shunting pliers conducts the electrical current from one side to the other. The E-coat at the mating surface burns away. The process is very quick and despite the fact most of the current flows between the electrode tips the current detour was brief but necessary.

DOOR SKIN PLIERS

DF-DSP310

- Provides clamping without interrupting flange fold over
- Holds the door skin securely in place

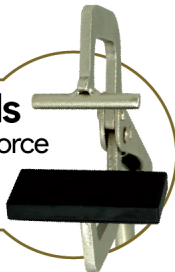

PERFECT FOR RE-SKINNING

Adjustable for different panel thicknesses

2 Special Contact Pads

Inner Contact Bar spreads the force evenly & Outer Pad prevents damage to the outer panel.

SURGE PROTECTOR

DF-601A

- Protects electronics from surges
- For 24 volt systems, 2 required
- Not for use on EVs or hybrids

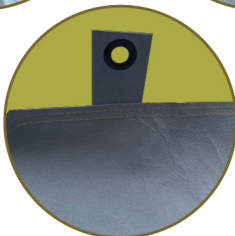

LIFETIME WARRANTY

DOOR PROTECTION WELDING COVERS

DF-WB100

- Shields exterior & interior components from grinding/welding debris.
- Pocketed construction and contoured shape ensure ultimate fitment.
- Heavy duty leather & reinforced stitching provide elite level of protection.

PLASTIC REPAIR STATION

Ditch the Bottle

Save yourself from refilling nitrogen bottles!
Convert shop air into N₂ instead of paying for refills.

The **DF-EZN1G/DXE EZ Nitro Deluxe Station** is the most comprehensive plastic work station available. All the tools needed are bundled in one tight package. From grinders to hot staplers, everything is included to help you profit from the repair of expensive plastic parts. Improve shop efficiency by turning light hit vehicles faster. On board nitrogen generation just makes this a sweeter deal !

CONSUMABLES - See PG 50 & 67

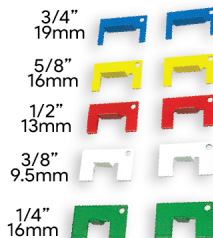

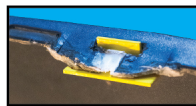

Part No. **DF-EZN1G/DXE**

AIRLESS WELDER DF-EZA1

Simply plug into a 110V socket and begin welding damaged plastic parts back together! Adjustable heat setting for multiple plastic types. Includes plastic welding rod samples (ABS, Polypropylene, Polyethylene, Polycarbonate, and Polyurethane), smoothing tip, and feeder tip.

EZ TAB REPAIR KIT DF-EZTAB

Assists in performing fast, strong slot tab repairs on plastic parts. 5 Different sized slot dies, ranging in size from 1/4" (6mm) to 3/4" (19mm). The included hand seamer is used to compress the tab after welding.

Replacement Tabs: 10pc Variety
DF-EZTABS, 3/4" DF-EZTABB,

PLASTIC REPAIR

LI-ION BATTERY HOT STAPLER DF-600BR

Three functions in one

- Install hot staples, airless weld plastic, and smoothing iron.
- Handheld unit is small in stature but very capable in tight spaces.
- Complete the job in one charge.

**3 TOOLS
IN ONE**

**RECHARGEABLE
BATTERY**

Kit Includes:

Main Unit, Hot Stapler Head, Iron Head, Air Welder Head, Plastic Rod Samples, Staple Samples, Patch Mesh, and Hard Case

HOT STAPLER BOX DF-400BR

**STAPLERS ARE AN
INVALUABLE TOOL**

**110V
VOLT**

- Installs staples to repair tears in plastic
- Saves thermoplastic parts from the trash
- 3 heat settings: Light Duty, Regular, HD
- Handle + base station

Kit Includes:

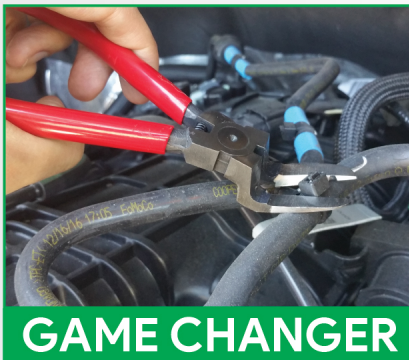

Hot Stapler

- x50 S-Clip StapleClips (DF-800SC/50)
- x50 V-Clip StapleClips (DF-800VC/50)
- x50 M-Clip StapleClips (DF-800MC/50)
- x50 Z-Clip StapleClips (DF-800ZC/50)

MULTI-CLIP PLIERS DF-625

Multiple tools in the palm of your hand

- Remove, pry, or cut tabs
- Disassemble trim clips
- Also cuts tubing or zip ties

3PC CLIP SET DF-618XL

- Removes fasteners & clips
- Great for upholstery removal
- Disassemble door panels
- 245×11, 370×11, 250×5mm

ALSO AVAILABLE INDIVIDUALLY

- A** DF-618XA | 250mm x 5mm
- B** DF-618XB | 370mm x 11mm
- C** DF-618XC | 245mm x 11mm

5PC CLIP KIT DF-618LK

- For plastic fasteners & clips
- Used for upholstery removal
- Door panel removal
- Angled & curved for leveraging

- K** DF-618CK | 11mm S-Clip Lifter
- N** DF-618CN | 7mm Clip Lifter - Wide
- L** DF-618CL | 7mm Clip Lifter - Narrow
- M** DF-618CM | 5mm Half-Round Clip Lifter
- J** DF-618CJ | 11mm Angled Clip Lifter

SWIVEL RIVETER DF-CT888

- Ultimate access for rivet placement
- 360° Rotational head
- Includes 5.0 & 6.3mm rivets

CONSUMABLES PLASTIC RIVETS

5.0mm (50 pc) DF-CT887RS
6.3mm (50 pc) DF-CT887RL

SLIMLINE RIVETER DF-CT887

- Access the tightest places
- 2" Gap clearance
- Works around wheel arches
- Includes 5.0 & 6.3mm rivets

CONSUMABLES PLASTIC RIVETS

5.0mm (50 pc) DF-CT887RS
6.3mm (50 pc) DF-CT887RL

BLOW MOLDED
CASE INCLUDED

NYLON POP RIVET ASSORTMENT DF-NRAK

- Most popular rivets
- Clearly marked and organized
- Tackle box style case

5 PC DOOR WEDGE SET DF-622

- Utility wedge set
- Great for molding removal, popping clips, scraping, and wedging

5-PIECE
MOLDING
REMOVAL

WEDGE LIFTER DF-WK20

- Perfect for glass, weather stripping, and interior plastics

COMBI WEDGE DF-619

- Wedge plus clip removal tool
- For dash & door panel removal
- Hard to lose, hi-vis yellow
- Constructed of strong plastic
- Pivot point for prying
- Length: 8.5"

WEDGE + CLIP
REMOVER

2 TOOLS
IN-ONE

HEAVY DUTY SCISSORS DF-HDSC1 & DF-HDS1

- Micro Teeth provide precise cutting of plastic, leather, cloth, rubber, gaskets, wire and other automotive materials.

DF-HDSC1
185mm

DF-HDS1
200mm

PLASTIC REPAIR

SOFT-SHOCK mallet

“PALM SAVER”

DF-SM76

Apply a strong striking force AND avoid damaging or scratching parts!

APPLICATION

Non-marring soft blow hammer, works great on aluminum body panels, bumper covers, and trim. This mallet is perfect for part fitment.

FEATURE & BENEFITS

- **RUBBER HOUSING** - Special contact housing designed to reduce damage to delicate surfaces.
- **SOFT SHOCK** - Non-Newtonian fluid filler is engineered to compress and dissipate the force.
- **STEEL SHAFT** - Angled 15° to protect against accidental contact.
- **NON-SLIP GRIP** - Ideal gripping position and feel to insure safety and control.

DESCRIPTION

Discover all the new ways **Soft-Shock Mallet DF-SM76** can be utilized on many collision repair jobs. The special non-Newtonian filler can compress and dissipate force, designed to reduce damage to the repair surface area. Apply firm precision taps for “parts fitment negotiating” dashboards, head- or tail-light assemblies, windshield placement, plastic bumper covers, interior or exterior decorative trim, emblems, and GPR/PDR work. With the same mallet in hand, release heavy-handed controlled hits for steel or aluminum body panels, roof rails, alloy wheels, and center caps. Its your new favorite mallet!

Head Height: 2 13/32 in

Head Width: 3 3/64 in

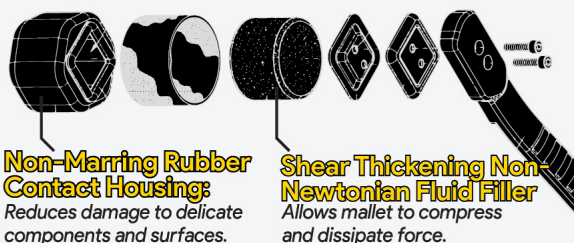

Head Weight: 13 oz

Total Weight: 1.48 lb

Total Length: 10 1/4 in

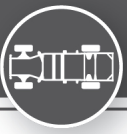

A CLOSER LOOK INSIDE

What is Non-Newtonian Fluid?

In non-Newtonian fluids, viscosity can change when under force to either more liquid or more solid. You may have come across it and didn't know it. Do you remember in childhood mixing corn starch and water? The mixture is called “oobleck” or “magic mud” and is a perfect example of non-Newtonian fluid. When it was punched or hit it became impenetrable but a soft touch easily breaks the surface.

Body Buggy

CHASSIS ROLLER

Rack Time is Expensive

Free up your rack in minutes! Quick and safe method to transport disabled vehicles off a rack. Vehicle is secured and easily rolled onto a frame machine or into a paint booth.

The Body Buggy makes the difficult task of moving a disabled vehicle around the body shop simple and safe. After a simple five minute installation, the unit becomes “part of the vehicle”, negating the need to employ any unstable or dangerous lift points. The included spacer kit allows for the use of original fasteners, alleviating the need for any additional fastener inventory.

FEATURE & BENEFITS

- **FREE UP RACKS** - Quickly move disabled vehicles off the rack when waiting on parts, inspections, or other costly delays.
- **HIGHLY MOBILE** - Move the vehicle by hand over speed bumps, dips, or uneven pavement.
- **VERSATILE** - Install on the front or rear of most any vehicle with the wheel assemblies placed on either side of the mounting point.
- **MADE IN THE USA** - Design & manufactured in California for the utmost in quality.

CONFIGURATIONS

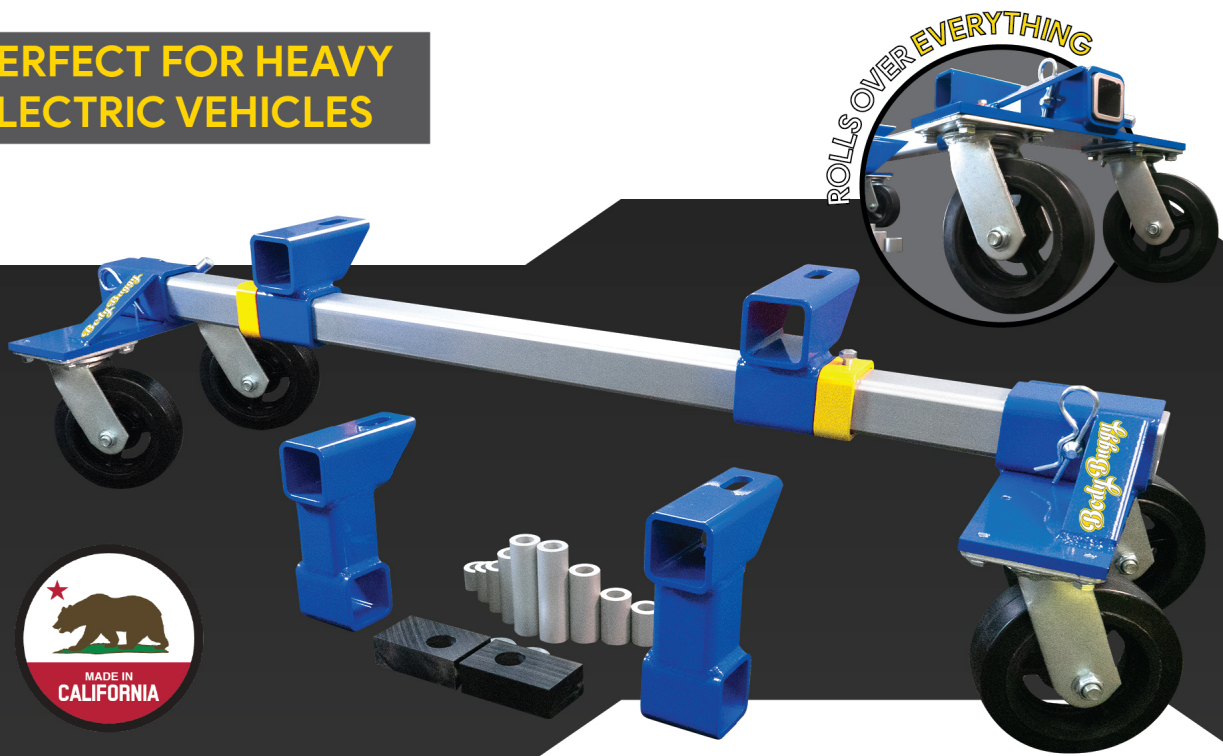

DESCRIPTION

The patented **Body Buggy** makes the difficult task of moving a disabled vehicle simple and safe. After a simple five minute installation, the unit becomes “part of the vehicle”, negating the need to employ any unstable or dangerous lift points. The included spacer kit allows for the use of original fasteners, alleviating the need for any additional fastener inventory. When installed, the vehicle is easily rolled onto a frame rack, into a paint booth or to storage, out of the way of production. The device can be installed on the front or rear of most any vehicle using the cradle or sub-frame mounting points and hardware.

STATICZAP DF-EZAP

- Neutralizes static charge
- Eliminates dust attraction
- Metal flake will stand up and sparkle

**GREAT
FOR
WINDOW
TINTS &
WRAPS**

PRO TIP:

Save Time & Frustration

"Too often, body shops overlook the importance of proper preparation and cleanliness in the paint process, and rely on the buffing/polishing phase of the repair process to address paint quality related issues. Reimbursement for denib & polish or color sand and buff is generally poor, and often more labor is spent than what we are compensated for. The StaticZap is a vital tool that all painters should incorporate into their pre-application routine to reduce the time spent with re-do's and buffing/polishing after paint. Easy to use, and the difference is huge. Any paint team looking into increase their productivity and reduce their cycle time should definitely invest in this tool. I did not receive any compensation for this review—this is an unbiased assessment."

HAND TOOLS

MAGNETIC PAINT CLAMP DF-PC203

- Strong & fast way to secure parts
- For a controlled spray painting/coating
- Magnetic base & powerful wedge grip

MAGNETIC LED LIGHT DF-LED935

- Super bright COB (Chip on board) LED
- Hangable magnetic swivel base
- Adjustable dimmer switch

RAZOR SCRAPER SET DF-608

- Narrow blade great for removing windows
- Clean polyurethane & stickers from glass
- 12, 16, 20mm straight blade & 16mm angled

PERFECT FOR TESLA ROOF GLASS

SUCTION GUN DF-SG70

- Safely remove head/tail lights and glass-like surfaces
- Hold windows in place while working on window regulators
- Quick release button

Press the rubber cup flat against a clean, dry glass surface. Squeeze trigger to engage.

When engaged the gray locking button will click. Press gray locking button to disengage suction.

**REMOVE SNUG PARTS,
LESS BREAKAGE**

MAGNETIC CABLE HOLDER DF-MGCH

- Organizes the cables up and off the floor.
- Strong magnetic base easily holds heavy cables.
- Pair of two (2) holders.

**STRONG
MAGNET**

27 PC TRIM PANEL SET DF-623TPS

- Safely remove interior & exterior trim pieces.
- Wide array of options to get the job done.
- Remove air vents, door trim, & dashboard pieces.
- "Ninja master set" - B. Lee
